

I support RM-10867. I am a amateur radio operator of about eleven years. I am also a secondary guidance counselor and I thought it would be good to let the FCC tell President Bush it is helping to support our "Education President". I'm sure the White House would be very pleased by what this petition will do for the tens of thousands of schools and teachers who will be able to more fully introduce radio communications, technology, and public service to many young people. I am also hopeful that more SAREX schools will be able to come into existence. Ham radio is a great learning tool and will bring more quality into the lives of American students, who will also be some of our best good will ambassadors, speading the voice of freedom, and democracy. The FCC needs to act quickly for the benefit of amateur radio, students, and the White House. I thank you.
